terms & conditions

1. HP Trade-In program structure

Within the framework of the Trade-In program, HP ensures when purchasing a new HP product an appropriate rebate if following conditions are met:

Only new products are allowed to take part in the Trade-In program. Demo products as well as remarketing or used products are excluded from participation. The HP new product needs to be purchased at an authorized Hewlett Packard distributor.

The new purchased HP product needs to be the replacement of the old equipment at the customer site.

The only people who are allowed to participate are end customers, using the new HP Product on their own and being the owner of the returned product at least 6 months prior to the purchase of the new product.

HP retains the right to ask endcustomers for appropriate proof of ownership.

Resellers are allowed to participate on behalf of the endcustomer.

HP retains the right to contact the favoured endcustomer.

Applications for restitution in the Trade-in program for the new HP device must be submitted no later than 30 days after the date of invoice.

Hewlett Packard reserves the right to limit the maximum amount per reseller or end user to 5000 €/month. For any application with trade-in value higher than 5000 €/ month, customers would need to get in touch with an HP sales representative.

Hewlett Packard also reserves the right to reject any request with no further explanation. Rejection of a request could be based on promotion defined parameters like

- incomplete documentation,
- excess over limit based on number of requests (no more than 10 requests per month allowed)
- amount of Trade-In discount (no more than 5000 €/month without HP consultation)
- accepted type of customer (program targeted to end-users, with acceptance of resellers claiming on behalf of the end-users)

Hewlett Packard reserves the right to reject a request if any justification document is missing within 7 days after participation.

The period of the promotion, the new HP products subject to the promotion and the trade-in value are named on the web site. Hewlett-Packard retains the right to change or terminate this campaign at any time with a two weeks notice.

2. Offer requests

The participant can obtain information about the program and an offer on the web site of the HP Trade-In program under the address: www.hp.com/eur/tradein.

3. Trade-in agreement

The participant can carry out the trade-in of the products via the HP Trade-In program web site. By accepting the trade-in agreement, the participant confirms that he/she is the legal owner of the products delivered in payment, and that this ownership is not subject to the rights of third parties, as for example reservation of property.

The trade-in agreement between HP and the participant is achieved through the acceptance of the 'HP trade-in quotation'.

4. Proof of purchase

The proof of purchase must contain the following information:

- Invoice of reseller to endcustomer
- name and address of the end customer,
- name and address of the HP reseller, in accordance with the statement on the letterhead,
- model and serial number of the products which the end customer has purchased from the HP reseller.

if the HP reseller is participating on behalf of an end customer the proof of purchase needs to contain following information:

- Invoice of reseller to endcustomer
- name and address of the end customer,
- name and address of the HP reseller,
- invoice of the distributor to the reseller in accordance with the statement on the letterhead,
- model and serial number of the products which the end customer has purchased from the HP reseller.

The end customer invoice must be received within 7 days after registration. If the invoice is not received, the request will be cancelled.

5. Terms and requirements for the Trade-In program

The trade-in prices as indicated by Hewlett-Packard only apply for products that are ready for operation. The equipment must be returned complete, in good working condition and with all accessories belonging to it (including modules, transceivers, MiniGBICs, redundant power supply, other removable parts, manuals, network cards, CD, power cable, etc.).

6. Rebate terms

The trade-in rebate is paid by Hewlett-Packard to the participant. The payments will be made by electronic bank transfer within 45 days after receipt of the return products at our test centre. If the products are not ready for pick-up on the agreed date, and our carrier has to come again on another day, the participant will be charged the incurred additional cost.

Payments can only be made to a bank account within the country where the participant takes part in the Trade-In program.

7. Collection of the old devices delivered in payment

The participant has to make sure the equipment to be returned can be collected on the date stated in the 'HP trade-in application for restitution' and that collection can be carried out on the ground floor. On the agreed date, Hewlett-Packard will dispatch a carrier to the address stated by the participant in the 'HP trade-in application for restitution'. If it is not possible for our carrier to come on the agreed date, he will contact you to agree a new date.

The period between acceptance of offer and actual pickup must not exceed 30 working days.

The equipment to be collected must be packed ready for shipment and needs to be packed on pallets if its weight exceeds 70 kg. The trade-in number must be clearly visible on the outside of the packaging. Attach the packing slip in a way that it is easy to read and cannot be lost.

HP will only pick-up the equipment within the respective national boundaries.

If these requirements are not complied with, additional costs can incur which, if any, are charged to the participant.

8. Non-return clause of devices delivered in payment

The handover of products delivered in payment to Hewlett-Packard is obligatory. Once shipment has taken place, any products delivered in payment or accessories attached will be returned again to the participant. These goods remain the property of Hewlett-Packard.

9. Transfer of ownership and risk

The ownership of the products will be transferred to HP upon handover of the products to the carrier.

10. Returning an incorrect product

If a product other than stated in the 'HP trade-in application for restitution' has been placed ready for pick-up by the participant, HP is entitled to charge the participant the incurred cost for the reconsignment, insofar as the mistake was not obvious for HP.

11. Non-compliance with the terms for the consignment of the trade-in products

Should the old equipment received by Hewlett-Packard differ from the products specified in the application for restitution, Hewlett-Packard is entitled to invoice, i.e. to debit the participant the difference in value between the stated and actually received old equipment, or likewise, to set off against the difference in value. The equipment the participant wants to trade-in must:

- **be returned complete together with all accessories belonging to it,**
- **be in a good general condition and**
- **in the instance of printers, the printer must be capable of printing out a test page.**

Trade-in products that are neither complete nor in a good working condition will not be sent back to the participant.

12. HP will dispose the returned products environmentally friendly.

13. This offer cannot be used in conjunction with other sales promotion measures or special agreements with Hewlett-Packard, in particular OPG, which are offered at the same period.

14. Trade-in agreements that are incomplete or that contain false statements cannot be processed.

15. End customers or resellers proven a misapplication will be excluded from the Trade-In program.

16. Invoicing

HP Trade-In programme requires the acceptance of a self credit invoice by customer. To ensure consistent and valid invoicing HP creates a proposed self credit invoice on behalf of the customer and sends it to the customer for acceptance. Once the proposed self credit invoice is accepted by the customer then HP will make the respective payment and issue a final corresponding invoice.

A failure to send a valid acceptance on the proposed self credit invoice will result in the Customer's claim to be rejected and invalidates customer's participation in the HP Trade-In Programme.

Should an invoice be required for tax or accounting reasons, consider the following:

It is absolutely necessary to indicate the order number on the invoice. Without an order number HP is not able to assign/process the invoice. The invoice will be balanced within our automatic payment system. There is no relation between our order number and your invoice number.

The old device is dispatched within the EU and does not remain within the national boundaries within which the participant took part in the Trade-In program.

Important information for creating and sending the invoice.

Please send your invoice with the following letterhead

Hewlett-Packard International Sarl
C/o Hewlett-Packard GmbH
Herrenberger Str. 140
D-71034 Böblingen
VAT Reg.No. DE813162264

The old device is dispatched within the EU and does not remain within the national boundaries within which the participant took part in the Trade-In programme.

The invoice must be sent to the following postal address:

Hewlett-Packard International Sarl
c/o TechProtect GmbH
Trade-In Department
Postfach 1801
D-71008 Böblingen
